

# emkon.

## Multipacker

# FACTS AND FIGURES

## emkon. Multipack

### THE MACHINE

The **emkon. Multipacker** arranges pre-packed individual products by means of perforated labels to a unit and forwards them to an optional tray packer which finally packs the units into the trays.

### MACHINE DATA

intake capacity	600 products per minute
discharge capacity	max 150 products per minute (dependence on batch)
drive	servo-system
control	Siemens S7
current consumption	22 kVA

### MATERIAL DATA

label measurements	58 x 66 mm (others possible)
reel of labels inner diameter	76 mm (3")
reel of labels outer diameter	400 mm

### FEATURES

Options:

- label bundles from 3 pack to 12 pack
- simple combination with tray packer machines
- consumer-friendly separation of packaging material

### YOUR BENEFITS

- Very small footprint
- Product exchange with short set-up times
- substantial reduction of packaging material
- superior machine operability by one side handling
- economical bundling of individual products

### OUR SERVICE FOR YOU

#### MACHINE BUILDING

- developments
- customized solutions
- serial machine productions

#### SERVICE

- new electrifications
- machine modifications
- rebuild
- service and maintenance
- training
- documentation
- CE risk analysis
